DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claims 1 recites a member which appears to be recited as a connector and a component. The applicant needs to either change claim 1 or have the connector be defined as the member and component. It is not clear if the member or the connector or component is correctly recited. This is confusingly worded because the same element is being renamed but recited as though it were separate elements.

b. Claim 1 states that the member inserts into the a component of the first assembly which is a shaft or gear but there is no mechanism which really accepts the member.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kopras (6048260).

Kopras discloses the claimed invention as recited in claims 1-2.

3. Claims 1-2 and 6-16 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1129825 A2.

EP 1129825 A2 discloses the invention as claimed in claims 1-2 and 6-16. The connector is figure 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-5 and 32-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1129825 A2 in view of Keller (3574374).

- a. EP 1129825 A2 discloses the claimed invention except for an aperture component in the first shaft connecting the connector.
- b. Keller discloses an attachment having a shaft (32) with an aperture (100) for attaching to a connector (60) which allows for an alternative way connecting the shaft to a motor for powering the attachment.
- c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the EP 1129825 A2 device by

replacing the shaft with an aperture as taught by Keller which allows for an alternative way connecting the shaft to a motor for powering the attachment.

Allowable Subject Matter

6. Claims 17-31 are allowed.

Response to Arguments

7. **Applicant's arguments filed 10/24/05 have been fully considered but they are not persuasive.**

8. **Applicant has tried to overcome the rejections of claims 1-16 and 32-37.**

d. The 112 issues have not been overcome because some type of mechanism has to be mentioned that will accept the member. The claim does not clearly call for the connector as configured in the instant application. Claims 17-31 clearly recite a connector of sorts and are allowed as a result. The claims 32-37 are broad enough to be rejected. Therefore rejections stand.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
